Peshawar General Store & Drinks Wholesale

ORDER IN YOUR LANGUAGE. CONFIRM WITH CERTAINTY.

Hackathon Examiner Overview

AI-native B2B wholesale commerce for Peshawar shopkeepers and tenant wholesalers

ONE PLATFORM · FOUR ROLES · EXPLICIT CHECKOUT

The Problem

Traditional wholesale still runs on phone calls, WhatsApp threads, and handwritten lists. Shopkeepers struggle to confirm stock and MOQs; wholesalers lose track of approvals; delivery and invoices live in separate silos. Errors multiply when language and urgency collide.

Our Solution

One intelligent platform connects shopkeepers, wholesalers, admins, and delivery partners. Multilingual AI drafts carts from live inventory; humans still confirm checkout. Tenant isolation, dispatch, invoices, payments, and email alerts keep the full order lifecycle in sync.

CORE FEATURES — IMPLEMENTED

AI ordering · EN / اردو / پښتو

Gemini when available; deterministic agents on quota — never silent inventing.

Voice-to-order

Record → Stop → STT → AI reply. No fabricated transcripts; no auto-checkout.

Four-role dashboards

Shopkeeper, wholesaler, admin, and delivery — each with RBAC and real workflows.

Catalog, cart & checkout

Live stock, MOQ checks, multi-wholesaler split orders, idempotent confirm.

Inventory & delivery

Approve → reserve stock → assign run → status timeline → release on failure.

Email, invoices & security

Outbox notifications, invoices/payments, bcrypt + JWT RBAC, password reset.

HOW IT WORKS

Shopkeeper (AI / Catalog) → Order (Explicit confirm) → Wholesaler (Approve · Reserve) → Invoice & Pay (Ledger truth) → Delivery (Dispatch run)

Why this is not a basic wholesale site

Conversational commerce is wired to real stock and carts — with honest Gemini fallbacks, human confirmation before every order, tenant isolation, and a full fulfillment money path. The product is demo-ready end-to-end, not a UI shell.
